Heavy rain showers (night)	Heavy rain showers	Heavy rain showers	Light rain showers	Partly cloudy (night)	Partly cloudy (night)
Precipitation probability					
40%	60%	60%	40%	20%	20%

Forecast for Sunday 20 Dec 2020

Weather: Bright and breezy with a few showers around, potentially heavy at first but tending to ease with time. Some sunny or bright spells expected during the day and most likely a clear, dry evening.

Chance of cloud free mountain/hill tops above 600m: 80% chance of cloud free tops, low cloud will be a problem in the early morning especially in the west and cloud will fall below the tops in showers for some of the time, falling to around 500m in any heavier showers.

Visibility: Good or very good outwith showers but becoming moderate in showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Freezing level lowering for a time during the day so starting to feel quite cold on the hills.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Sun 20 Dec 2020	10mm	55.6mm	78mm

Forecast for Monday 21 Dec 2020

Weather: Some frontal rain is expected to spread across the Brecon Beacons from the west overnight, it will mainly be light and drizzly at first but a few heavier spells are likely. Turning clearer later in the day.

Maximum wind: Southerly 15mph gusts 25mph veering westerly and then Northwesterly later

Chance of cloud free mountain/hill tops above 600m: 20%, a lot of low cloud will spread across the area with the rain, cloud bases are likely to be down to 300m at times. Low cloud will lift and clear in the evening time.

Visibility: Visibility will be moderate at best and often poor in light rain and drizzle

Temperature: **Valleys:** Plus 4 rising to plus 8 Celsius.
At 600m: Plus 1 Celsius rising to plus 5 Celsius then falling to zero later.
Freezing level: 900m rising well above the summits then falling to 700m later
